

HACKXTREME

Organized by GDG X GLEC

Team Details

- a. Team name: CIS (Tech Titans)
- b. Team leader name: SHAIK ABDUL RAZAK
- c. Team Members Names: K.Ramya, P.Rajesh, Suraj Bhan
- d. College Name: Chaitanya Deemed to be university

Problem Statement

Online examinations are increasing rapidly, but ensuring fairness in remote environments is difficult

Existing proctoring systems have major limitations:

- ☐ Binary cheating detection (Yes/No)
- ☐ High false accusations
- ☐ Privacy-invasive webcam monitoring
- ☐ Cannot detect intelligent cheating behavior
- ☐ No behavioral understanding

Student may cheat using:

- ☐ External devices
- ☐ Screen Switching
- ☐ External help
- ☐ Impersonation
- ☐ Unusual interaction patterns

Note: There is a need for **Ai- based intelligent system** that predicts cheating risk instead of only detecting cheating.

Proposed Solution

We propose an **AI-Based Online Exam Cheating Risk Predictor**

A cognitive-behavioral probability-based proctoring framework that:

- Tracks student behavior in real time
 - Analyzes gaze, posture, typing, and interaction
- T**
- Uses AI to detect anomalies
 - Generates cheating probability (0–100%)
- R**
- Provides explainable and ethical monitoring
 - Reduces false accusations
- K**

Architecture Diagram

System Architecture

Machine Learning pipeline in Production

Technologies/Tools Used

Working prototype

Used Tech Stack

Learn Programming
Master Python for coding

Manage Database
Use MongoDB for data

Explore Computer Vision
Use OpenCV and MediaPipe

Create Frontend
Design with HTML/CSS

Understand ML
Work with TensorFlow and PyTorch

Build Backend
Develop with Flask

Target Audience/Market

Working prototype

Target Users:

- University
- Colleges
- Online learning platforms
- Certification platforms
- Government exams
- EdTech companies

Market Need:

- ✓ Growing Online exams
- ✓ Need for fair evaluation
- ✓ Demand for ethical AI monitoring
- ✓ Scalable remote proctoring

This solution can be used in:

- NPTEL
- Coursera
- College LMS
- Competitive exams
- Company assessments
