

HACKXTREME

Organized by GDG X GLEC

Team Details

- a. Team name: CIS (Tech Titans)
- b. Team leader name: SHAIK ABDUL RAZAK
- c. Team Member Names: K. Ramyasri, P. Rajesh, Suraj Bhan
- d. College Name: Chaitanya Deemed to be university

Problem Statement

Online examinations are increasing rapidly, but ensuring fairness in remote environments is difficult

Existing proctoring systems have major limitations:

- ☐ Binary cheating detection (Yes/No)
- ☐ High false accusations
- ☐ Privacy-invasive webcam monitoring
- ☐ Cannot detect intelligent cheating behavior
- ☐ No behavioral understanding

Market Capital

1. \$10B Global online education market is increasing rapidly
2. 15-20 % students are flagged falsely
3. 50M Students appear online exams every year with no fair

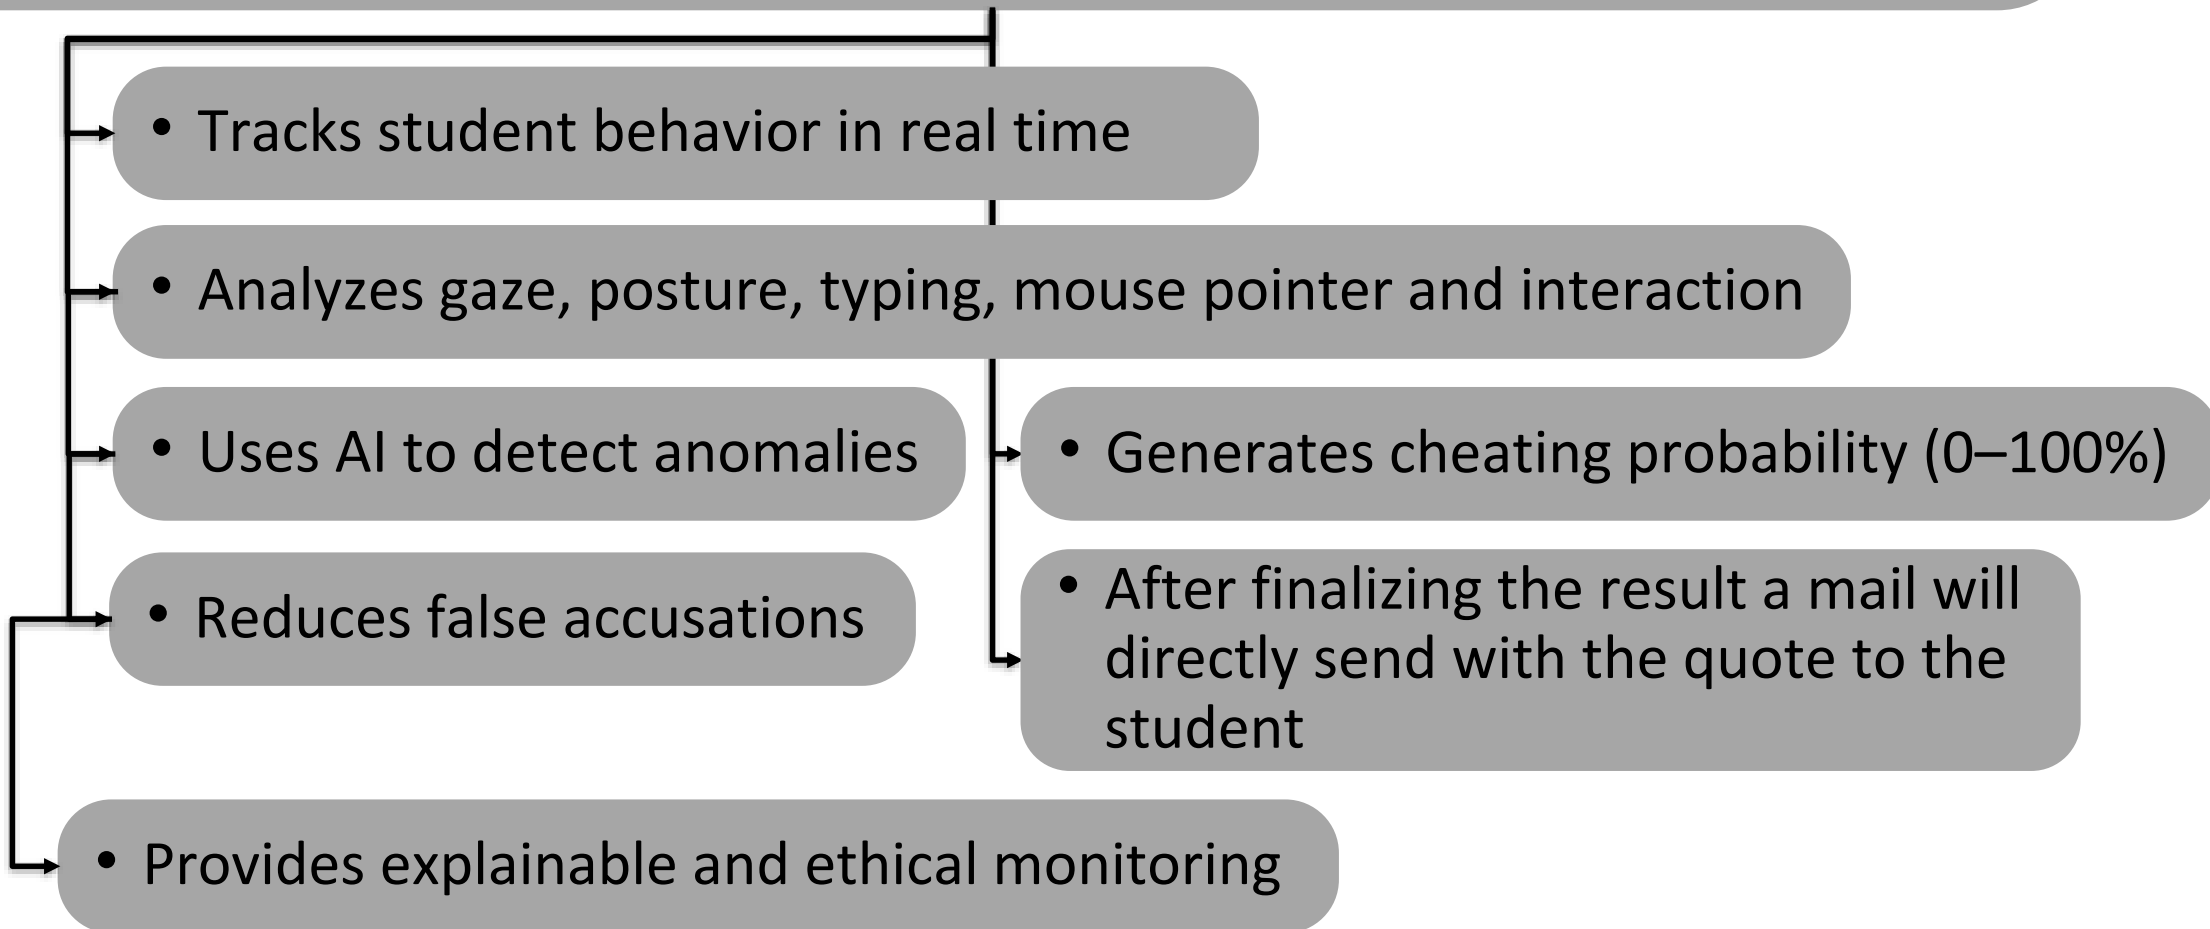

Note: There is a need for **Ai- based intelligent system** that predicts cheating risk instead of only detecting cheating.

Proposed Solution

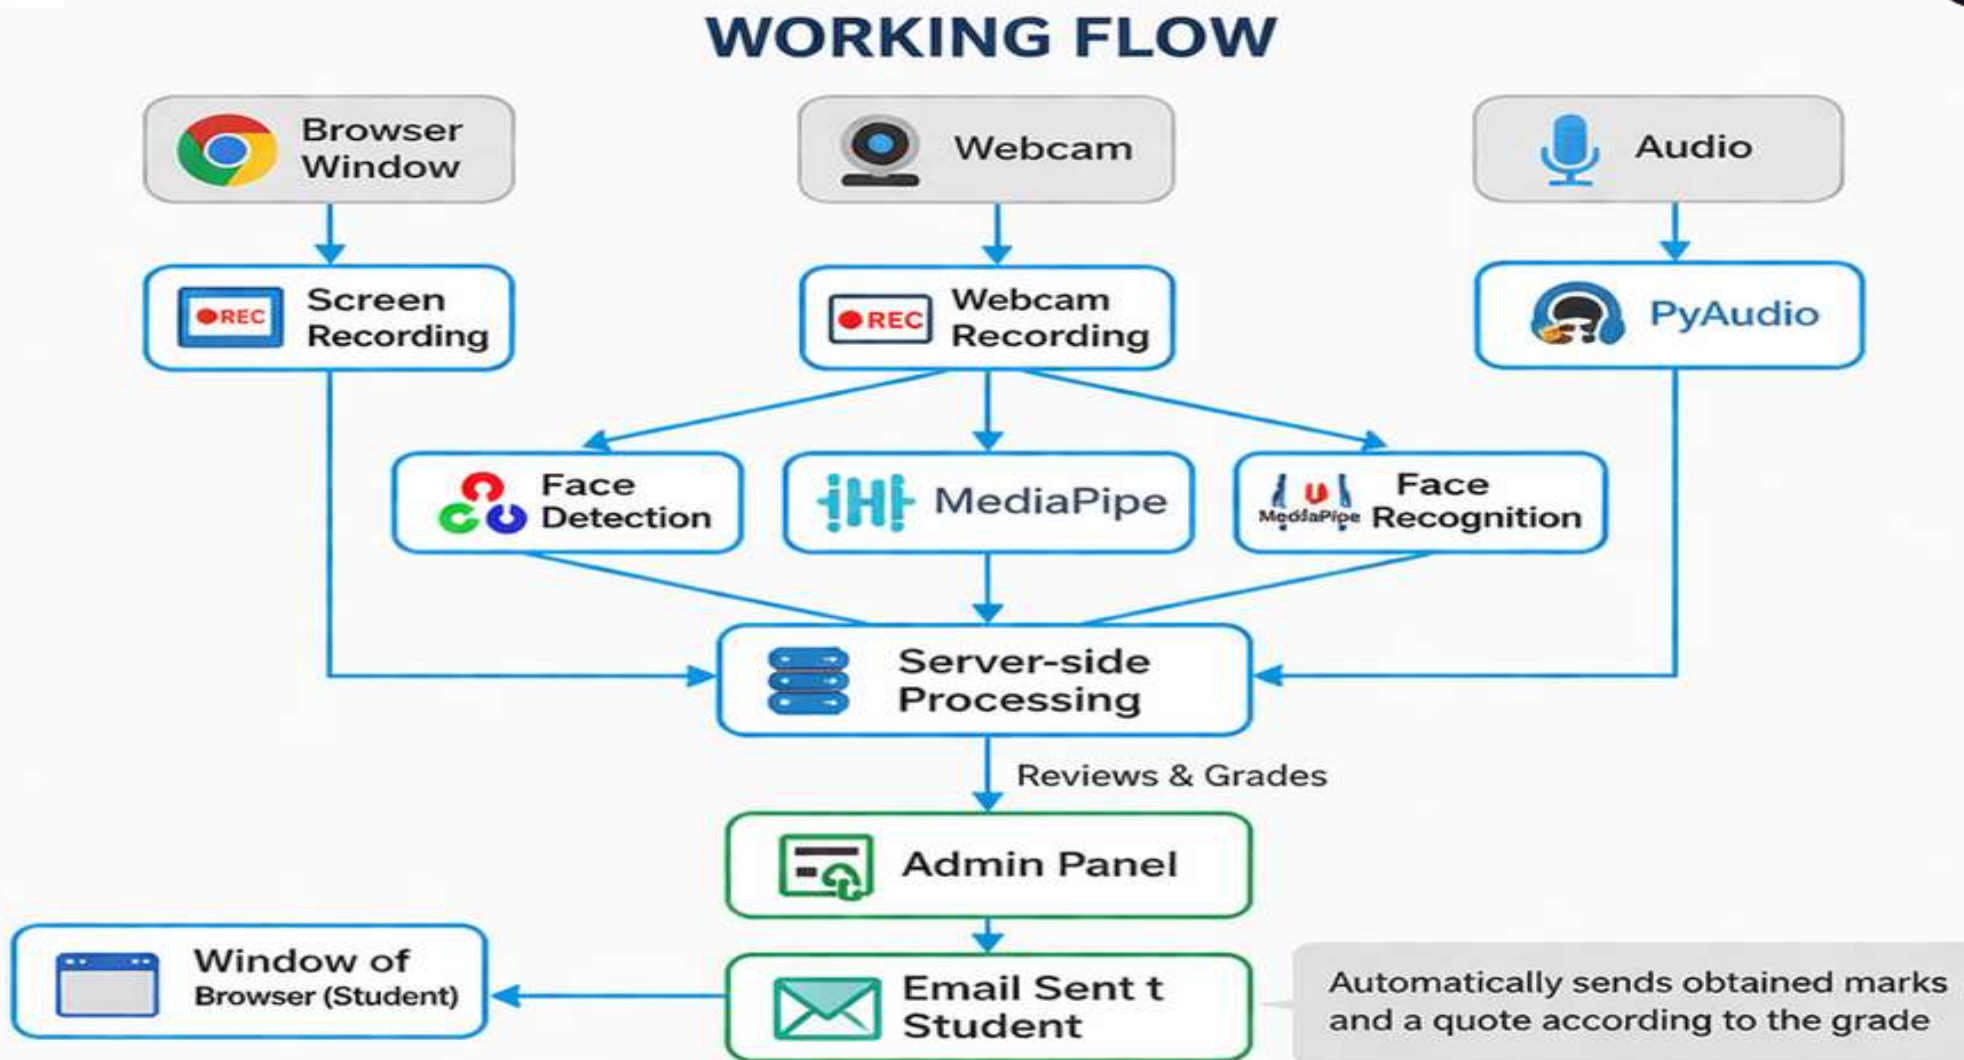

We propose an **AI-Based Online Exam Cheating Risk Predictor**

A cognitive-behavioral probability-based proctoring framework that:

Working flow diagram

Market Opportunity

A Billion Dollar Problem. A Scalable Solution.

\$1.6 Billion — Global online proctoring market in 2024

\$6.5 Billion — Projected market size by 2030

26% CAGR

Our 3 Unfair Advantages:

1. Advantage 1 — Probability Over Binary
2. Advantage 2 — Ethical AI First
3. Advantage 3 — India First

Note:- Instead of having a reactive solution we have predictive solution

AI Response Verification & Mark Evaluation

Generated Answer recommendations based on AI model. Estimated Risk Probability

ANSWER VERIFICATION: 100%

RECOMMENDED MARK: 100%

ESTIMATED SCORE: 100%

AI RECOMMENDATION: 100%

Mark Entry & Remarks

Enter final marks and comments for this student

Marks (out of 100): 100

Remarks / Comments: good

Target Audience/Market

Target Users:

- Online learning platforms
- Certification platforms
- Government exams
- EdTech companies
- Colleges & University

Market Need:

- ✓ Growing Online exams
- ✓ Need for fair evaluation
- ✓ Demand for ethical AI monitoring
- ✓ Scalable remote proctoring

This solution can be used in:

- NPTEL
- Coursera, edx
- College LMS
- Competitive exams
- Company assessments
- Allen, PW, Motion
